

Rapid Payback on Marelec Portion Cutters

Faster than ever ROI on Marelec portion cutters
for fish processors

sfengineering.net

Stock of the current range of advanced portion cutters from industry-leading manufacturer Marelec is currently available, and you can get a rapid return on investment. Savings will be made on both increased yield and reduced operator requirements.

Why the PORTIO?

- Fast return on investment
- Cutting-edge portion cutting technology
- Ideal for portioning fish products
- Average increased yield of 2% compared to manual portioning
- User-friendly software
- Hygienic and easy to clean
- Unparalleled portioning accuracy
- Full engineering, integration, and ongoing support from the SF Engineering team, including spare parts, servicing, and maintenance

Typical applications

PORTIO 1

Single camera machine for cutting fish fillets into portions or cubes of fixed weight, fixed thickness, or any combination.

PORTIO 3

3-camera machine for cutting whole fish and loins into steaks of fixed weight or fixed thickness, or any combination.

Portions

Cubes

Or any combination

Whole fish into steaks

Loins into steaks

Portion Cutter Payback and Yield Improvement Calculator

Use the calculator to test your products

Our portion cutter calculator will provide you with two essential figures to help with your decision-making process. The first is the percentage increase in yield that you can expect by integrating a Marelec portion cutter on your production line. The second is the estimated payback time on your investment. To use the calculator visit: www.sfengineering.net/calculator

PORTIO Equipment Servicing & Spare Parts

Expert support for your Marelec portioning equipment from our skilled service technicians

As part of our PORTIO Service Level Agreements (SLAs), we will carry out regular service inspections and perform detailed preventative maintenance checks and necessary calibrations to maximise uptime and enhance your portioning reliability.

SLAs are available for both newly installed and existing PORTIO machines, and they are fully customised to ensure all calibration, maintenance, and related equipment is covered according to your requirements.

Included as standard

- 2 Sites visits per year
- Full service
- Full machine health check
- Unlimited remote support
- Discount on spare parts
